

Notice to BB interested parties on the change in flow data reporting for Moomba to Sydney Pipeline

This notice advises BB interested parties that the following changes are proposed for reporting of the Moomba to Sydney Pipeline (MSP) flows from 1 September 2015.

The gas flows for MSP demand zone ID 520010 will remain as is: demand supplied through the MSP including its laterals through Wilton CG and Canberra CG (Watson) but excluding export flows to Victoria via the Interconnect.

The MSP flows for Moomba production zone ID 550017 will include deliveries to Moomba.

$$\text{Zone 550017} = \sum \text{MSP Receipts}(\text{Moomba} + \text{SWQP}) - \text{MSP deliveries to Moomba}$$

Positive flows reported against the Moomba production zone ID 550017 will indicate net gas flows from Moomba towards Sydney.

Direction of flow for the Moomba zone will be reflected by movement of the arrow in the region indicated in the map below:

The following map illustrates the zones that the MSP flows will be reported against:
