

Notice to BB interested parties on a correction to the Notice issued on 16 September 2015, regarding flow data reporting for Moomba to Adelaide Pipeline System

This notice is a correction to the notice published on 16 September 2015, advising BB interested parties of the changes for reporting of the Moomba to Adelaide Pipeline System (MAP) flows from 17 September 2015. The correction to the original notice appears in red below.

The gas flows for MAP demand zone ID 550018 will remain as is: demand supplied through MAP system including all laterals and including the Adelaide demand zone.

The MAP flows for Moomba production zone ID 550017 will include deliveries to Moomba.

$$\text{Zone 550017} = \sum \text{MAP Receipts}(\text{Moomba} + \text{SWQP}) - \text{MAP deliveries to Moomba}$$

Positive flows reported against the Moomba production zone ID 550017 will indicate net gas flows from Moomba towards Adelaide.

Direction of flow for the Moomba zone will be reflected by movement of the arrow in the region indicated in the map below:

The following map illustrates the zones that the MAP flows will be reported against:
