

Notice to all BB interested parties

16 June 2015

Exemption of BB Pipelines and Production Facilities – GLNG Operations Pty Ltd

On 12 June 2015, subject to the conditions in this notice, AEMO made an exemption declaration for each of the following pipelines operated by GLNG Operations Pty Ltd and the following production facilities operated by Santos TOGA Pty Ltd and Santos CSG Pty Ltd for the purposes of the Natural Gas Services Bulletin Board:

- Gladstone transmission pipeline (Petroleum Pipeline Licences ('PPL') 166, 167 and 168);
- Comet Ridge to Wallumbilla Loop (PPL 118); and
- Fairview Laterals (PPL's 147 and 164),

(collectively, the Pipelines).

- Fairview Hub Compression Station 4 (F-HCS-04 on PL 232); and
- Roma Hub Compression Station 2 (R-HCS-02 on PL8/PLA318),

(collectively, the Facilities).

The exemption for the Pipelines has been made in accordance with clause 149(5)(b):

- The BB pipeline does not, or (in the case of a proposed BB pipeline) will not, transport natural gas between a production zone and a demand zone, between demand zones or between production zones

The exemption for the Facilities has been made in accordance with clause 151(7)(a):

- the natural gas from the BB production facility does not, or (in the case of a proposed BB production facility) will not, flow (directly or indirectly) into a BB pipeline

The exemption declaration for each Pipeline is effective from the later of the day the operator commissions the Pipeline and the day the exemption declaration is made for that Pipeline.

The exemption declaration for each of the Facilities is effective from the later of the day the operator commences to operate the Facility and the day the exemption declaration is made for the Facility.

The exemption has the effect that the Pipelines and Facilities are not BB pipelines or BB production facilities for the purposes of the National Gas Rules.

The exemption declaration for each Pipeline and each Facility will be revoked automatically upon Curtis Island LNG being added as a Demand Zone in the Natural Gas Services Bulletin Board Procedures.

AEMO also received an application from the operator of the following production facility to have the production facility declared exempt on the basis of clause 151(7)(a) of the National Gas Rules.

- Fairview Hub Compression Station 5 (F-HCS-05 on petroleum lease (PL 91)).

On 12 June 2015 AEMO refused to make an exemption declaration for Fairview Hub Compression Station 5 as natural gas from this facility does or will flow into a BB pipeline, and hence does not satisfy the exemption criteria in clause 151(7)(a) of the National Gas Rules. The effect of this refusal is that Fairview Hub Compression Station 5 is a BB production facility for the purpose of the National

Gas Rules from the time Fairview Hub Compression Station 5 commenced or commences operation and therefore the provisions applicable to BB production facilities under Part 18 of the National Gas Rules including registration and providing information apply to Fairview Hub Compression Station 5.

Bulletin Board Operator.
